

using the same script create a managed disk and attach it to existing vm

```
}
PS C:\Interns2026> az vm show `
>> --resource-group varshabv06-rg `
>> --name vinvm06 `
>> --query "storageProfile.dataDisks[].name" `
● >> -o table
Result
-----
vinvm06-disk1
```

```
PS C:\Interns2026> az vm disk attach `
>> --resource-group varshabv06-rg `
>> --vm-name vinvm06 `
>> --name vinvm06-disk1
```

```
PS C:\Interns2026> az storage account keys list `
>> --resource-group varshabv06-rg `
>> --account-name varshabv06store01 `
>> --query "[0].value" `
>> -o tsv
yP78VkbibuLbF+bZzDx4Luuf+ZPP120AzN4Fup+6z0SVYtqGEaqc0QigiNgcX7khai7FQ71D6meN+AStQX7rYQ==
PS C:\Interns2026> az storage container create `
>> --name scripts `
>> --account-name varshabv06store01 `
>> --account-key yP78VkbibuLbF+bZzDx4Luuf+ZPP120AzN4Fup+6z0SVYtqGEaqc0QigiNgcX7khai7FQ71D6meN+AStQX7rYQ==
{
  "created": true
}
```
